DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

In line 10 on page 13, "294" should be - -394- -.

Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "clock multiplier circuit" as recited in claims 3 and 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of

the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1-13 are objected to because of the following informalities:
- (1) In claim 1, line 13, insert - -the- - before "transmitter circuit";
 - (2) In claim 9, line 30 (line 1 of page 104), change "transmitter" to - -transmit- -;
 - (3) In claim 9, line 34, change "transmitter serial data" to - -transmitted serial data- -;
 - (4) In claim 13, line 30, change "transmitter" to - -transmit- -; and
 - (5) In claim 13, line 34, change "transmitter serial data" to - -transmitted serial data- -;
- Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-13 would be allowable if rewritten to overcome the objections, set forth in this Office action.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach and suggest a method of testing a transceiver circuit, comprising the step of coupling a receiver clock signal recovered from the serial test

Art Unit: 2634

data by the receiver circuit to at least a portion of a transmitter circuit, thereby bypassing a reference clock used in the normal operation mode by the portion of the transmitter circuit in response to the test command.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

The objection as described above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
